**Georgetown, Texas:** Georgetown Rail Equipment Company (GREX) is pleased to announce the appointment of Greg Grissom to Chief Operating Officer / Executive VP Customer Delivery. During his tenure with GREX, Greg has served as Vice President Engineering and played an important role in the development of new technology solutions and overall growth of the company.

CEO and President, William (Wiggie) Shell said, "Greg is a valuable asset to the GREX team and has proven that he's able to effectively lead. We strive to bring talented and hard-working people to our team that also have a passion for the rail industry. Greg has exemplified those qualities and we believe he will continue to help us to exceed our goals as a company."

In his new role at GREX, Grissom will continue to lead the engineering team, but will additionally oversee Operations & Safety, Marketing & Sales and Information Technologies.

"I am pleased to take on these additional responsibilities during exciting times at GREX," said Grissom. "The commitment of our board and our employees, to delivering safety-focused technology solutions for our customers has been one of the great motivators while at GREX. I look forward to my new responsibilities, continuing to innovate and being a part of the bright future of this organization."

Prior to GREX, Greg was HNTB's Union Pacific Client Service Leader and Project Manager on multiple key rail design projects including several high speed initiatives. Greg also served at Zeta-Tech Associates where he was involved in rail research projects, field studies and rail industry specific software applications.

**About GREX:** Since 1993, GREX has been putting technology to use to develop solutions that solve some of the oldest problems in the railroad industry. The privately held company is based out of Georgetown, Texas and works in collaboration with customers across the globe to deliver custom solutions designed around their specific needs. GREX pinpoints where ballast is needed and automates its delivery, locates track flaws to keep operations running smoothly, helps railroads monitor bridges remotely, and much more. From the pioneering DumpTrain ballast delivery system to the new Aurora Xi™, track inspection system, GREX products stand out among the rest as more technologically advanced, safer and more efficient.
